DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/24/09 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1,3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites a soybean protein and liquid sugar plastic mixture comprising 38% soybean protein and 60% sugar in the form of a liquid. In light of the term 'consisting essentially of' in the claim, it is unclear what components if any may be present in the remaining 2% by weight of the plastic mixture.

Claim Objections

5. Claim 1 objected to because of the following informalities:
6. It is suggested to modify line 2 of claim 1 to read '...soybean protein and a sugar in the form of a liquid' and line 4 of claim 1 to read '...wheat flour or wheat flour with ~~and~~ wheat dough raw materials...'

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
8. Claims 1,3-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sugihara (JP 05023094-English Translation).

9. Grenby (Properties and Applications of Isomalt and Bulk Sweeteners) is cited as evidence.

10. Sugihara discloses a method of producing wheat flour doughs comprising soy protein, for example as a sponge cake. The method proceeds by first producing a plastic mixture consisting essentially of liquid sorbitol and soybean protein ([0025]). This plastic mixture is produced and then added to wheat flour and wheat dough raw materials such as fats or oils, eggs, and powdery sugars ([0026], [0030]). The plastic mixture containing soybean protein and sugar in the form of a liquid contains 88.808 total parts of ingredients, and about 59.208 parts of anhydrous solid matter. The soybean protein makes up approximately 13.5% of the anhydrous solid matter and the sorbitol makes up approximately 81% of the total plastic mixture, which is considered to be in such close proportion to the claimed 80% sugar in the form of a liquid so as to have the same properties.

11. Regarding claim 3, as evidenced by Grenby, sorbitol solutions having concentrations as used in Sugihara possess water activities lower than 0.95 (see Figure, curve b).

12. Regarding claim 4, the amount of soybean protein present in the wheat dough of Sugihara will be 6 parts out of 360 total parts ([0030]), or 1.67%.

13. Regarding claim 5 the dough is baked ([0031]).

14. Regarding claim 6, canola (rapeseed) oil is used ([0025]).

Response to Arguments

15. Applicant's arguments with respect to claims 1, 3-6 have been considered but are moot in view of the new ground(s) of rejection.
